### Product Description

## JCB 560-80 AGRI Telescopic Handler

The JCB 560-80 Agri Plus is a highly efficient EcoMax-powered telescopic handler. It's the most powerful telescopic handler we've ever built, geared for maximum capacity, power, and productivity.

In response to feedback, we fit a powerful engine, and a Z-bar linkage (forming our toughest-ever telescopic boom), and, as a result, achieved a huge breakout force.
