Product Description

50' 50 amp Generator Cord

Designed for use with manual transfer switches and power inlet boxes, this heavy-duty, all rubber power cord connects a portable generator to the power inlet box or manual transfer switch.

Product Details: 6-gauge, 4-wire, 125/250 VAC power cord for portable generators. Connect 14-50 plug to the generator, and CS6364 connector to power inlet box or transfer switch. Thermoset weather-resistant rubber remains flexible even in subzero temperatures. NEMA 1450 male and locking CS6364 female. For use with generators with 50 amp outlet. Compatible with generators up to 12500 Watt.
